Description

Stick'em where ever you like... Our stickers stay stuck. We offer a huge range of exceptionally priced decals, labels and stickers. Whether you want them square cut or forme cut to shape, we have you covered. Variable-data printing (VDP) (Also known as variable-information printing (VIP) or VI) is a form of digital printing, including on-demand printing, in which elements such as text, graphics and images may be changed from one printed piece to the next, without stopping or slowing down the printing process and using information from a database or external file. For example, a set of labels, each with the same basic layout, can be printed with a different name on each label. Variable data printing is mainly used for direct marketing, customer relationship management, advertising, invoicing and applying addressing on selfmailers, brochures or postcard campaigns. Please note these stickers aren't made for sticking in outdoor environments
